INDEXES TO ITEMS

IN

NICKEL BULLETIN, 1963

VOLUME 36

1. Subject Index (Technical Abstracts) 311-319

2. Corrigenda 320

3. Trade-Names, Materials and Processes 321

4. Name Index (Technical Abstracts) 322-324

5. Name Index (Patent Abstracts) 325

6. Subject Index (Patent Abstracts) 326-327

SUBJECT INDEX TO VOLUME 36

In the Index, the subjects are classified according to the section in which the items referred to appear in the Bulletin (**NICKEL, ELECTRODEPOSITION,** etc.). The reader seeking information should look first for the section covering the materials associated with the field in which he is interested, and then for the appropriate sub-section (within which the items are entered in alphabetical order). The page number given is that on which the abstract containing the particular reference begins.

Trade-Names, Materials and **Processes** referred to in this volume are listed on page 321.

LEADING ARTICLE

Ni-Hard Type 4: A Wear-Resistant Martensitic White Iron with Improved Resistance to Fracture under Repeated Impact 170-2

NICKEL

Analysis

: Determination of Cobalt 238
: Determination of Silicon 62

Determination

: In Copper and its Alloys 63
: In Iron and Steel 259, 307
: In Stainless-Steel Corrosion Products 78
: In the Same Solution as Cobalt 63
: With 2,2′-Thiodiethanethiol 116

Composition, Properties and Structure

Aluminium-Silicon Alloys: Influence of Nickel on Hot Hardness 256
Cathode Nickel 201, 285
Caustic Alkaline Solutions: Protection of Nickel Plant Handling 246
Cold Working: Effects of 1, 62, 86
Corrosion Characteristics 17, 74, 156, 246
Creep and Creep-Rupture Behaviour 40, 86, 114, 200, 210, 221
Electrochemical Behaviour 2, 115, 175, 232
Electroformed Nickel; *see* **ELECTRODEPOSITION AND OTHER COATING METHODS**
Fatigue Properties at Low Temperature 136
Fluorine/Nickel Reaction 114
Friction Characteristics *in Vacuo:* Influence of Inclusions 200
'Ghost' Grain Boundaries 256
Hardness and Electrical Resistivity: Relationship in Cold-Worked Nickel 62
Heat Capacity 40
Hydrogen: Evolution from Nickel at Room Temperature 62
: Solubility in Liquid Nickel 40
Impact Strength at Low Temperature 57
Influence of Composition on Properties 114, 232
Magnetostriction and Residual Stress after Plastic Elongation 86
Nickel-Cadmium Batteries: Design Characteristics, Performance Data, Selection, Control, Charging and Servicing 40, 86, 115, 202, 203, 283
Nickel-Hydrogen System: Electrochemistry 115
Nickel-Scandium Hydroxide Electrode 203
Oxidation Behaviour 86, 175, 201, 232, 282
Recrystallization 1, 140, 256
Sintering of Tungsten Deposits: Activation by Nickel 175
Textures, Deformation and Recrystallization 1, 140
Wear Characteristics *in Vacuo:* Influence of Inclusions 200

General

Nickel: An Historical Review 173

Nickel-Clad Materials

Protection of Nickel Plant Used in the Continuous Concentration of Caustic Alkaline Solutions 246

Occurrence, Extraction and Refining

Roasting and Smelting Practice at the Thompson Plant of Inco 232
Thermodynamic Properties of Copper-Nickel-Sulphur Mattes at 1200°C. 203

Plating

Electrodeposition of Soldering Beads on Nickel 1

Powder Production, Properties and Uses
(*For* Nickel and Nickel-Alloy Powders in Dispersion-Strengthening, *see* **HEAT- AND CORROSION-RESISTING MATERIALS: Powder Production, Properties and Uses**)

Carbonyl-Nickel Powders, Sintered 283
Coinage, Powder-Produced 290
Flame-Sprayed Nickel-Aluminide Coatings 192, 298
Friction and Wear Characteristics of Nickel *in Vacuo*: Influence of Inclusions 200
Oxidation Behaviour of Sintered Nickel 232, 282
Residual Porosity in Powder Metallurgy: Symposium 282-5
Tungsten Deposits: Nickel-Activated Sintering 175

Processing
(*See also* **Welding, Brazing and Soldering**)

Nickel-containing Coinage 290
Vacuum Firing to Prevent Intergranular Sulphur Corrosion 17

Uses
(*See also* **Nickel Salts and Compounds,** *and* **ELECTRODEPOSITION**)

Activation of Plasma-Sprayed Tungsten Deposits 175
Coinage 173, 290
Corrosion-Resisting 17, 246
Electron Tubes 201, 285
Fungicides 140, 176
Heat-Exchangers 115
Missiles 17
Storage Batteries 40, 86, 115, 202, 203, 283

Welding, Brazing and Soldering
1, 28, 115

Nickel Salts and Compounds
(*See also* **ELECTRODEPOSITION**)

Fungicidal Applications 140, 176
Nickel-Aluminide Coatings, Flame-Sprayed 192, 298
Ti_2Ni and Ti_4Ni_2O: Crystal Structure 176
Vanadium-Nickel Compounds 257

ELECTRODEPOSITION AND OTHER COATING METHODS

Analysis of Solutions

Electroless Nickel-Plating Solutions: Determination of Sodium Hypophosphite 93
Nickel Solutions
: Determination of Boric Acid 93
: Determination of Nickel, Sulphate, Boric-Acid and Chloride Contents 117
: Determination of Sulphur-containing Brighteners 286

Electrodeposition of Alloys

Cobalt-Nickel Alloys 63, 236
Cobalt-Tungsten-Nickel Alloys 66, 236
Electroforming 63, 66, 236
Nickel-Alumina Dispersion-Hardened Alloys 141, 178
Nickel-Iron Alloys 141, 289
Nickel-Molybdenum Alloys 117
Tin-Nickel Alloys 91

Electrodeposition of Nickel, and Properties and Uses of Electrodeposited Nickel

Addition Agents and their Effects 3, 87, 88, 91, 177, 178, 257, 286
Aluminium: Black Nickel Plating of 288
Automatic Plating Plant 116
Black Nickel Plating 288
Brightening 3, 286
Carbonized Nickel Anodes 286
Chromium Overcoatings: Deposition and Properties (*See also* 'Corrosion Protection' *below*) 3, 41, 42, 87, 89, 90, 178, 179, 287
Corrosion Protection Conferred by Nickel/Chromium Coatings, including Reviews and the Influence of Chromium and the Underlay 3, 41, 88, 89, 90, 116, 178, 179, 287, 288
Corrosion-Resistance of Nickel Electrodeposits after Heating *in Vacuo* 287
Deformation: Influence on the Corrosion-Resistance of Nickel/Chromium Coatings 90, 178
Double-Layer Nickel 3, 41, 88, 89, 178, 179, 287, 288
EDTA-base Solutions: Electrodeposition of Nickel from 177
Electrochemical Behaviour of Nickel and Nickel/Chromium Deposits 2, 89
Electroforming, and Uses of Electroformed Components in the Automotive, Engineering, Recording, Printing and Aerospace Fields 4, 42, 63-7, 235, 236, 258
Electrotype Printing Plates 236
Engineering Industries, Nickel Deposition in: Symposium 233-6
Gramophone Records: Rôle of Plating in 4, 65
Heavy Nickel Plating 235
Levelling 3, 178, 286
Mechanical and Physical Properties of Nickel Electrodeposits 42, 64, 66, 90, 233, 235
Nickel Deposition in the Engineering Industries: Symposium 233
Pressure Vessels, Electroformed: Properties 42
Product Purity and Nickel Plating 116
Sandwich Coatings 89
Screens: Electroforming of 235
Stress in Electrodeposited Nickel 63, 64, 65, 87, 88, 177, 178, 233
Structure of Electrodeposited Nickel 87, 178, 232, 257
Technique and Applications of Nickel Plating: Review 176
Texture: Influence on Corrosion-Resistance 257
Titanium: Nickel Plating of 67
Wetting Agents 257

Other Coating Methods
(*See also* **HEAT- AND CORROSION-RESISTING MATERIALS: Clad, Faced and Lined Materials**)

Electroless Nickel Plating
: Determination of Sodium Hypophosphite 93

: Hardness Testing 142
: Hot Hardness 288
: Influence of Thiourea 233
: Review 235
: Structure of Deposit 2, 288
Nickel-Aluminide Flame-Sprayed Coatings 192, 298
Nickel-Carbonyl Plating 91, 289

Specifications

Tin-Nickel Coatings: *B.S.* 3597:1963 91

Testing

Accelerated-Corrosion Testing 41, 89, 90, 176, 178, 179, 287
Adhesion Testing 176
Atmospheric-Corrosion Testing 41, 88, 89, 90, 176, 178, 179, 288
Ductility Testing 176
Electrochemical Studies 89
Hardness Testing 142
Levelling: Method of Study 178
Stress: Determination of 65, 87, 88, 141

NON-FERROUS ALLOYS

(*See also* **HEAT- AND CORROSION-RESISTING MATERIALS**)

Analysis

Determination of
: Nickel and Cobalt in the Presence of Other Metals 63
: Nickel in Copper-base Alloys 63
: Nickel with 2,2′-Thiodiethanethiol 116
: Zirconium 68
Spectroscopic Analysis 181

Composition, Constitution, Structure

Aluminium-Silicon-Nickel Alloys 256
Carbon: Solubility in Cobalt-Nickel Alloys 204
Chromium-Nickel System 181
Cobalt-Nickel Alloys: Solubility of Carbon in 204
Copper-Nickel System 271
Copper-Nickel-Silicon Alloys 68
Cupro-Nickels 44, 142
Gunmetals 42, 117, 118, 142
Nickel-Cadmium System 291
Nickel-Chromium Alloys 67
Nickel-Copper Alloys 67
Nickel-Manganese Alloys 67
Nickel-Titanium Alloys 203
Texture Formation in Nickel-base Alloys 1, 140

Powder Production and Use

(*See also* **HEAT- AND CORROSION-RESISTING MATERIALS: Powder Production and Use**)

Copper-Nickel System: Sintering 291
Gold-Nickel System: Sintering 291
Nickel-Activated Sintering of Plasma-Sprayed Tungsten Deposits 175
Porosity in Powder Metallurgy: Symposium 282-5

Production and Processing

(*See also* **ELECTRODEPOSITION: Electrodeposition of Alloys**)

Beryllium-Nickel Alloys 4
Copper-Nickel-Silicon Alloys 68
Copper-Nickel-Sulphur Mattes 203
Gunmetals 42, 43, 93, 118
Nickel-containing Coins 290
Shrinkage Characteristics of Copper-base Alloys during Solidification 142
Working and Heat-Treatment 140

Properties

(*See also* **Specifications**)

Aluminium-Silicon-Nickel Alloys: Hot Hardness 256
Beryllium-Nickel Alloys 4
Bimetallic Contacts: Corrosion Prevention at 74
Copper-Nickel-Silicon Alloys 68
Copper-Nickel-Sulphur Mattes: Thermodynamic Properties 203
Copper-Nickel System: Stress Corrosion 271
Cupro-Nickels 44, 57, 109, 142, 148, 188, 218, 271, 276
Gunmetals 42, 43, 93, 117, 118
Nickel-Chromium Alloys: Magnetization at Low Temperatures 67
Nickel-Copper Alloys: Magnetization at Low Temperatures 67
Nickel-Manganese Alloys: Magnetization at Low Temperatures 67
Nickel Silvers 44, 142
Nickel-Titanium Alloy: Precipitation Behaviour 203
Sea-Water Corrosion 57
Shrinkage Characteristics of Copper-base Alloys during Solidification 142
Springs, Current-Carrying 44
Stress Corrosion: Resistance of Copper-Nickel Alloys to 44, 271

Specifications

188

Uses

(*For* Uses in Nuclear-Energy Plant and in Brazing Alloys, *see* **HEAT- AND CORROSION-RESISTING MATERIALS: Uses**)

Coinage 290
Corrosion-Resisting 44
Dies and Tools 4
Electrical Applications 68
Heat-Exchange 44, 109, 276
Pistons 256
Pressurized Castings 42, 43, 93, 117, 118
Springs 44, 68

Welding

Tube/Tube-Sheet Welds: Nickel-Alloy Surfacing Technique 276

NICKEL-IRON ALLOYS

Analysis

Iron-Nickel-Cobalt-Copper Alloys 69
Vacuum-Evaporated Films: X-Ray-Fluorescence Analysis 95

Composition, Constitution, Structure and Properties (*excluding* Magnetic Properties, *q.v.*)

'Alnico' Alloys: Grain Growth in 180
Austenite
: Activity of Carbon in 180
: Deformation Faulting 119
: Formed by the Reverse Martensitic Transformation 46, 119
Controlled-Expansion Alloys 180
Fatigue Properties 136
Glass-to-Metal Sealing Alloys 6, 292
Iron-Nickel-Cobalt Alloys: Stress-Corrosion Cracking 292
Martensitic Transformation 45, 46, 95, 119, 142, 204, 291
Oxidation 4
Spring Materials 13, 268
Strain-Ageing 5
Texture 140
Transformation Temperatures: Influence of Composition 204

Magnetic Properties and Uses arising therefrom

(*See also* **Powder Production and Uses**)

'Alnico' Alloys
: Grain Growth in 180
: Influence of Niobium on Properties 94
Electrodeposited Films 141, 289
High-Permeability Alloys 236
Magnetic Alloys: Literature Review 94

Powder Production and Uses

Nickel/Copper Compacts: Sintering Characteristics 22
Pre-Alloyed Powders 5
Sintered 'Alnico' Alloys: Influence of Niobium on Properties 94
Sintering in the Iron-Nickel System 291

Production and Processing

Design Considerations for Controlled-Expansion Alloys 180
Electrodeposition of Films 141, 289
Grain-Growth in 'Alnico' Alloys 180

CAST IRON

General

Austenitic Cast Irons
: Applications 13, 47, 96, 183, 292
: Continuously-Cast Bar 258
: Cylinder Liners: Wear of Unlubricated Piston Rings against 292
: Magnetic Characteristics 46, 144
: Properties other than Magnetic 47, 57, 96, 237
: Symposium 46, 120
: Wool-Processing Machinery: Suitability for 183
Continuously-Cast Bar in Nickel-containing Irons 258
Grey Irons: Case Histories 96
: Influence of Nickel on Structure and Properties 143
'Ni-Hard' 170, 182, 237
Sea-Water Corrosion 57

Spheroidal-Graphite Cast Iron

Austenitic S.G. Irons
: Applications 6, 13, 47, 96, 146, 183, 237, 258
: Continuously-Cast Bar 258
: Electrical Earthing 6, 96
: Magnetic Characteristics 144
: Properties (*See also* 'Magnetic Characteristics') 6, 47, 96, 143, 146, 237, 258
: Pump Casings: Production 146
: Symposium 46, 120
: Wool-Processing Machinery: Suitability for 183
Composition: Influence on Structure and Properties 95
Continuously-Cast Bar 258
Review 183
Specifications 95
Welding 97

CONSTRUCTIONAL STEELS

Analysis and Identification

Determination of
: Cobalt 238
: Nickel, Magnesium, Chromium, Copper and Cobalt by Flame Photometry 259
: Nickel with 2,2′-Thiodiethanethiol 116
Identification of Precipitates in Maraging Steels 259

Composition, Constitution and Structure

350°C. Embrittlement 7
9 per cent. Nickel Steel 122
950°F. Isothermal Temper Embrittlement 293
Air-Hardenable Cast Steel for Thick Sections 98
Ausforming 121, 261
Bainite Reaction in Nickel-Chromium-Molybdenum Steel 69
Banding 147
Burning and Overheating 206
Maraging Steels 7, 69, 70, 184, 185, 205, 259
Mass Effect 120, 146, 147
Shock Hardening 184
Transformation Characteristics (*See also* 'Austenite' and 'Martensitic Transformation' in **NICKEL-IRON ALLOYS: Composition, Constitution, Structure and Properties**) 99

Plating

Hydrogen Absorption and Embrittlement as a Result of Electrochemical Treatment 121, 234
Nickel Plating: Influence on Properties of Substrate 233

Production and Processing
(*See also* **Welding**)

9 per cent. Nickel Steel 9, 122, 237, 238
Ausforming 121, 261
Burning and Overheating 206
Carburizing 9, 147
Chemical and Electrochemical Processing 121, 234
Cold Working and its Effects 7, 184, 295
Decarburization: Control of 48
Forging 9, 147, 185, 293
Heat-Treatment, *including* Tempering and its Effects 7, 8, 9, 47, 49, 58, 97, 98, 99, 121, 122, 123, 124, 147, 148, 184, 185, 186, 204, 205, 237, 259, 293, 295
Machining 9, 100, 122
Maraging Steels 7, 9, 70, 100, 122, 184, 185, 205, 259
Marstraining 205
Melting Practice, *including* Vacuum Melting 47, 70, 97, 98, 120, 146
Nitriding 185
Shock Hardening 184, 261

Properties and Uses
(*See also* **Specifications** *and* **Welding**)

2¼ per cent. Nickel Steel 184, 204, 295
3½ per cent. Nickel Steel 57, 122, 123, 184, 205, 295
5 per cent. Nickel Steel 295
9 per cent. Nickel Steel 9, 49, 57, 122, 136, 184, 237, 238, 295
350°C. Embrittlement 7
950°F. Temper Embrittlement 293
Air-Hardenable Cast Steel for Thick Sections 98
Armour Plate 98
Ausformed Steels 121, 261
Banding 147
Burning and Overheating, Effects of 206
Carburized Steels 9, 147
Cold-Worked Materials: *see* **Production and Processing**
Decarburization, Effects of 48
Delayed Failure (*see also* 'Hydrogen Embrittlement') 260, 294
Fatigue Properties 6, 47, 136, 186, 187
Forgings for Rotors and Shafts, and Rotor Discs and Wheels 97, 98
Fracture Toughness 120
Hardenability of Nickel-Chromium-Molybdenum Steel 99
Heating Rate: Effects on Tensile Properties 244
Heat-Treated Materials: *see* **Production and Processing**
High-Strength Steels 7, 8, 9, 47, 48, 49, 69, 70, 71, 97, 98, 99, 100, 120, 121, 122, 124, 146, 147, 148, 184, 185, 186, 187, 205, 206, 244, 259, 260, 261, 293, 294
Hydrofoil Craft: Materials for 306
Hydrogen Absorption 121
Hydrogen Embrittlement 121, 234
Low-Temperature Properties 49, 57, 122, 123, 136, 184, 204, 205, 237, 238, 295
Maraging Steels 7, 8, 9, 69, 70, 100, 184, 185, 205, 259, 260
Marstrained Steels 205
Mass Effect in High-Strength Steels 120, 146, 147
Melting Practice, *including* Vacuum Melting: *for* Effects of, *see* **Production and Processing**
Recoilless Rifles: Development of Steels for 99
Rocket-Motor Cases 7, 185, 294
Sea-Water Corrosion 57
Strain-Ageing in High-Strength Steels 260
Stress-Corrosion Cracking of High-Strength Steels 71, 107, 148, 293, 294
T-1: Suitability for Carburizing 147

Specifications 97, 98, 237

Testing

9 per cent. Nickel Steel: Qualification Tests 49
Compression Test for Carburized Steels 9

Welding

300M Steel 186
2¼ per cent. Nickel Steel 184, 204, 295
3½ per cent. Nickel Steel 15, 122, 123, 184, 205, 295
5 per cent. Nickel Steel 295
9 per cent. Nickel Steel 15, 49, 122, 184, 237, 238, 295
Fatigue Behaviour of Welded Joints 186, 187
HY-80 Steel 124, 186, 187
Hydrogen Embrittlement of Welds 49
Maraging Steels 7, 8, 9, 186
Microdefects: Influence on Properties of Welds 186, 187
Phosphorus: Influence on Weldability 9
Weld Cracking, Susceptibility to 9, 48

HEAT- AND CORROSION-RESISTING MATERIALS

(*See also* **NON-FERROUS ALLOYS**)

Analysis, Identification and Determination

18-8 Steel: X-Ray Fluorescence Analysis 307
Determination of
: Bismuth in Stainless Steel 16
: Cobalt in High-Alloy Steels 238
: Lead in Nickel-Chromium-base High-Temperature Alloys 238
: Nickel by Flame Photometry 259
: Zirconium 68
Identification of Microconstituents in Nickel-base Alloys 101, 261
Identification of Structural Constituents in 18-8 Steels 160
Nickel-base Alloys: Spectroscopic Analysis 181
Nickel-Chromium-base High-Temperature Alloys: Spectrochemical Analysis 238
Oil-Ash Deposits: Analysis 269
Stainless-Steel Corrosion Products: Analysis 78
Stainless-Steel Production: Control Analysis 188

Bismuth: Influence on Hot-Workability 16
Boron: Influence on Creep Behaviour and Structure 209, 222
Cellular Precipitation 189
Cerium: Influence on Hot-Workability 15
: Influence on Corrosion-Resistance of Stainless Steel 134
'Chromel'/'Alumel' Thermocouples: Stability in Oxidizing Atmospheres 151
Chromium Depletion around a Grain-Boundary Precipitate in Austenitic Stainless Steels 27
Chromium-Nickel System 181
Cobalt-Nickel-Niobium Alloys: Structure 72
Discontinuous Precipitation in Precipitation-Hardenable Steels 52
Influence of Composition and/or Structure on Corrosion Behaviour 10, 11, 25, 74, 75, 76, 77, 108, 109, 134, 135, 156, 157, 158, 194, 220, 224, 226, 243, 271, 273, 274, 303, 306
Influence of Composition and/or Structure on Mechanical and Physical Properties 15, 16, 23, 24, 25, 55, 72, 101, 102, 114, 124, 126, 132, 134, 152, 154, 160, 190, 195, 196, 207, 208, 209, 211, 212, 215, 216, 217, 218, 220, 221, 222, 223, 240, 261, 262, 263, 264, 265, 270, 296, 297, 305, 306
Influence of Composition and/or Structure on Oxidation Behaviour 25, 52, 53, 73, 103, 109, 134, 151, 156, 190, 220, 223, 267
Influence of Composition on Structure 15, 16, 25, 51, 52, 71, 73, 75, 102, 152, 157, 208, 209, 222, 264, 296
Influence of High-Temperature Exposure (including Creep Testing) on Structure 51, 71, 72, 101, 102, 106, 128, 130, 131, 151, 152, 154, 155, 156, 158, 196, 207, 208, 209, 211, 212, 215, 219, 220, 221, 223, 263, 264, 267, 273
Intergranular Corrosion 27, 57, 74, 75, 106, 108, 134, 135, 224, 226
Martensite Transformation in Stainless Steels 305
N-155: Relationship between Microstructure and Service Temperature of Turbine Blades 151
Nickel-Chromium-Iron-Titanium Alloy: Precipitation Behaviour 71
Nickel/Fluorine Reaction: Mechanism 114
Nickel-Titanium Alloy: Precipitation Behaviour 203
Niobium: Influence on Precipitation Behaviour of 16-16-2Mo Steel 152
'Ni-o-nel': Electron Microstructure 262
Nitriding during Creep Testing: Influence on Structure 264
Oxygen: Influence on Hot Ductility of Stainless Steels 132
Phosphorus: Strengthening Effect on Type 316L Steel 270
Potentiostatic Etching of Structural Constituents in 18-8 Stainless Steels 160
Rare-Earth Additions: Influence on Oxidation-Resistance of Stainless Steels 25
Sigma Formation in Stainless Steels 154
Stabilized Stainless Steels: Structure at Temperatures above 1300°C. 51
Stress Corrosion 57, 77, 107, 135, 158, 193, 245, 271, 272, 273
Textures in Nickel-base Alloys 1, 140
Tin: Influence on Structure of Austenitic Stainless Steel 73
Titanium: Hardening Effects of 264
: Influence on Precipitation Behaviour of 16-16-2Mo Steel 152
Whiskers: Reinforcement with 239
Zirconium: Influence on Precipitation Behaviour of 16-16-2Mo Steel 152

Plating

Hydrogen Embrittlement of High-Strength Steels during Chemical and Electrochemical Processing 234

Powder Production; Properties and Uses of Powder-Produced Alloys

Dispersion-Strengthening 1, 17, 18, 19, 20, 21, 22, 127, 141, 148, 178, 265, 295
Nickel-Aluminide Flame-Sprayed Coatings 192, 298
Nickel/Copper Compacts: Sintering and Homogenization 22
Residual Porosity in Powder Metallurgy: Symposium 282-5
Whiskers: Reinforcement with 239

Production and Processing

CORRIGENDA TO ITEMS IN VOLUME 36

Issue No. 1-2, p. 13.
Recent Developments in Metals and Alloys for Use in Chemical Plant, third paragraph, line 9.
For 'Inconel' 825,
Read 'Inconel' 600.

Issue No. 4, p. 83.
Nickel-Copper-Alloy Welding Electrode, line 7.
For carbon $< 0{\cdot}2$,
Read carbon $< 0{\cdot}12$.

Issue No. 7, p. 155.
In the table headed, **Compositions of Steels Investigated in Sigma-Embrittlement Studies,**
For 30·0
Read 20·0
as the nickel content of steel 6.

Issue No. 12, p. 296.
Development and Properties of 'Udimet' 520, the sentence following the table.
For niobium,
Read cobalt.

Issue No. 12, p. 299.
Corrosion of Nickel-base Heat-Resisting Materials in Gas-Turbine and Boiler Atmospheres.
For B. HANCOCK,
Read P. HANCOCK.

TRADE-NAMES, MATERIALS AND PROCESSES

Referred to in Nickel Bulletin, Volume 36, 1963

The page number given is that on which the abstract containing the reference begins.

PATENTS: SUBJECT INDEX

The titles of the patent abstracts are classified below according to the material or field to which the patent relates.

Nickel

Electrodes for Nickel-Cadmium Batteries 31, 79, 161, 247
Nickel Carbonyl: Production 30
Nickel-coated Tungsten-Carbide Particles for Hard Facing 35
Nickel-containing Fungicides 31, 79
Nickel Thermionic-Cathode Alloys 31, 247
Scandium-containing Nickel-Alkali Electrode 161

Electrodeposition and Other Coating Methods

Black Nickel Coatings: Electroless Deposition 248
Chromium-Nickel-Alloy Coatings: Deposition by Gas Plating 32
Electroless Deposition of Bright Ductile Nickel Coatings 79
Electroless Nickel Coatings: Treatment for Improving Corrosion-Resistance and Appearance 248
Fine-Grained Satin-Nickel Coatings: Electrodeposition 79, 248
Magnesium: Pre-Treatment and Chemical Nickel Plating 32
Nickel/Copper/Nickel Corrosion-Resisting Coatings 161
Nickel-Phosphorus-Alloy Magnetic Coatings: Electrodeposition 248
Nickel-Plated Steel: Vapour-Blasting Treatment 161
Nickel Plating by Chemical Reduction with Amine Boranes 80
Stainless-Steel Coatings: Electrodeposition 79
Uranium: Nickel Plating 248
Vapour-Blasting Treatment for Nickel-Plated Steel 161
Zinc: Direct Nickel Plating 248

Non-Ferrous Alloys

Copper-Nickel-Alloy All-Position Welding Electrode 36
Cupro-Nickel with Improved Mechanical Properties and Satisfactory Weldability 80
Extrusion of Copper-Nickel Alloys 80
Nickel-containing Copper Alloy with Improved Electrical Conductivity and High Hardness 162
Nickel-Copper-Alloy Welding Electrode 83

Nickel-Iron Alloys

'Alnico' Alloys: Method of Hot Working 248
Glass-to-Metal Seals 32
Gold-containing Nickel-Iron Soft Magnetic Alloy 162
Nickel-base Transformer-Core Alloy with a Low Hysteresis Factor 162
Nickel-containing Sintered Permanent-Magnet Alloys 32
Nickel-Iron Alloy Exhibiting High Resistivity and a Rectangular Hysteresis Loop 162
Nickel-Iron Alloy with a Low Coefficient of Expansion 162

Cast Iron

Austenitic S.G. Iron with High Notch-Ductility at Low Temperatures 32
'Ni-Hard'/S.G. Iron Composite Mill Liners 249

Constructional Steels

Helmets in Nickel-containing Low-Alloy Steel 33
Nickel-Cobalt-Molybdenum Maraging Steels 32, 249
Welding Wire for High-Strength Low-Alloy Steels 252

Heat- and Corrosion-Resisting Materials

Austenitic Heat-Resisting Steels 165
Austenitic Steel for the Manufacture of Generator Rings 162
Austenitic Steels for Fuel-Element Sheaths 34
Castable Iron-Nickel-Chromium Austenitic Alloy Resistant to Corrosion by Leaded-Fuel Combustion Products 251
Cast Austenitic-Steel Components: Preparation for Welding 165
Chemical Machining of Nickel-base Alloys 81, 82
Chemical Machining of Stainless Steels 81, 82
Decarburization Treatment for Rendering Chromium-Nickel Steel Resistant to Intergranular Corrosion 35
Dispersion-Hardened Nickel 249
Ductile Nickel-Cobalt-Chromium Casting Alloys for High-Temperature Applications 33
Filler Wire for Automatic Shielded-Gas Welding of Austenitic Steels 165
Flux for Use in Brazing and Soldering Nickel and Nickel-base Alloys 36
Forgeable Nickel-base Alloy for Engine Components 81
Gold-Nickel-Molybdenum Alloys for Brazing Graphite 82, 252
Heat-Treatment for Improving the Corrosion-Resistance of Welded Nickel-Chromium-Molybdenum Alloys 35
Heat-Treatment for Improving the High-Temperature Impact Strength of Nickel-base Alloys 163
Hot-Forming Chromium-Nickel Austenitic Stainless Steels with Sub-Eutectic Boron Values 35
Hot Working of Nickel-Chromium-base Age-Hardenable Alloys 251
Iron-Nickel-Chromium Alloy for Gas- and Steam-Turbine Applications 164
Iron-Nickel-Chromium-base Alloy for Furnace Parts 81
Iron-Nickel-Chromium-base Precipitation-Hardening Alloy 164
Iron-Nickel-Chromium Hard-Facing Electrode 163
Nickel-Aluminide Coatings: Production 35
Nickel-base Alloys Exhibiting Improved Tensile Properties at High Temperatures 81
Nickel-base Boron-containing Sintered Alloy 34
Nickel-base Casting Alloy for Gas-Turbine Applications 33
Nickel-base Casting Alloy for Turbine Blading 164
Nickel-base Gas-Turbine Alloy for Use at Temperatures up to 2200°F. 250
Nickel-base High-Temperature Casting Alloy 163
Nickel-Chromium Alloys Resistant to Corrosion and Abrasion by Molten Glass 251
Nickel-Chromium-base Arc-Welding Electrode for All-Position Welding 165
Nickel-Chromium-base Casting Alloys 33
Nickel-Chromium-Cobalt Alloys for Use in Sheet Form 249

Nickel-Chromium-Cobalt-base Alloys for Use at 1000°C. and above 250
Nickel-Chromium-(Cobalt)-base High-Temperature Alloy 250
Nickel-Chromium-Cobalt Gas-Turbine Rotor-Disc Alloy 250
Nickel-Chromium-Germanium-Copper High-Temperature Brazing Alloy 166
Nickel-Chromium-Iron Alloys Suitable for Use in Steam Plant 165
Nickel-Chromium-Iron-Cobalt-Tungsten Alloy for Furnace Parts 81
Nickel-Chromium-Molybdenum Alloys with Improved Resistance to Intergranular Corrosion 82
Nickel-Chromium-Molybdenum Stainless Steels Resistant to Corrosive Slurries 34
Nickel-Chromium-Phosphorus Brazing Alloy 166
Nickel-Chromium Thermocouple Alloy 33
Nickel-Chromium-Tungsten Alloy Resistant to Boron-containing Combustion Products 34
Nickel-containing Alloys for Brazing Graphite to Graphite 36
Nickel-Germanium-Chromium-Palladium-Copper High-Temperature Brazing Alloy 166
Non-Magnetic Chromium-Nickel Austenitic Stainless Steel for Oil-Well Drill Collars 252
Palladium-Nickel-base Alloy for Brazing Stainless Steel and Alloys containing Titanium and Aluminium 166
Precipitation-Hardenable Stainless Steels with Improved Resistance to Overageing during Service 80
Precipitation-Hardenable Stainless Steels: Production of Ductile Welds in 166
Separation of Constituents of Nickel-, Cobalt- or Chromium-containing Alloys 82
Sintered Aluminium/Metal-Oxide Material Resistant to High-Temperature Water 34
Sintered Nickel-base-alloy Turbine Blades 34
Stabilized Austenitic Steel Resistant to Hot Cracking 82
Stainless Steel with High Resistance to Hot Cracking and Hot Tearing 251
Transition Piece for Dissimilar-Metal Welding 165
Vacuum Treatment for Application to Nickel-Chromium-base Creep-Resisting Alloys 163
Vanadium-containing Nickel-Cobalt-Chromium-base Creep-Resisting Alloys 81
Weldable Nickel-Chromium-Cobalt-base High-Temperature Alloy 164
Welding Rod for Welding Ferrous Metals under Water 252
Weld Overlaying of Hot-Work Dies 83

© *The International Nickel Company (Mond) Limited 1964*

Attention is drawn to the fact that many of the names of materials mentioned in The Nickel Bulletin are *Trade Marks*.

A Publication prepared by the
